

A-M-T 1.8.8

CREATE SHEETS

COMMAND GUIDE

Creates sheets from selected source views and places the views using a chosen reference layout.

A-M-T TOOL SERIES

Configure.
Run.
Review.

01 Understand the options

02 Follow the workflow

03 Check the result

Understand the settings

Source views

Choose the source views to include. The command checks for available, non-primary views.

Legends

Choose whether legends from the reference layout should be copied.

Reference sheet

Select a reference sheet to guide viewport placement.

Numbering

Set the starting sheet number and numbering format (for example, A-101).

View templates

Choose the templates used for generated views; exclude templates or view types not required.

Preview

Review the proposed sheet/view set before creating the sheets.

How to use Create Sheets

1. Choose the source views and reference sheet.
2. Select the required templates and legend options.
3. Set the starting number and numbering format.
4. Preview the proposed output, then create the sheets.

EXPECTED RESULT

A-M-T creates the sheets and places the selected views using the reference arrangement. Review the resulting sheet set and adjust any project-specific details.

Before you finish

QUICK CHECKLIST

- ◯ Correct model and active view
- ◯ Required types/templates are loaded
- ◯ Review settings before running
- ◯ Inspect the output in Revit
- ◯ Save a backup before bulk changes

COMMAND FLOW

01 SELECT

02 CONFIGURE

03 RUN

04 VERIFY

NOTES & LIMITATIONS

The command depends on suitable source views, available title blocks and a valid reference layout.
