

A-M-T 1.8.8

CURTAIN WALL

COMMAND GUIDE

Builds curtain-wall documentation views and organizes them on a dedicated sheet.

A-M-T TOOL SERIES

Configure.
Run.
Review.

01 Understand the options

02 Follow the workflow

03 Check the result

Understand the settings

Plan template

Template applied to the generated plan view.

Elevation template

Template applied to curtain-wall elevations.

Section template

Template applied to curtain-wall sections.

First mark

Starting mark used for the generated curtain-wall documentation (default example: CW01).

First sheet number

Starting sheet number for the output sheet.

Sheet name

Name assigned to the curtain-wall sheet.

Title block

Title block used for the new sheet.

Linked models

Optional linked-model context used by the command.

How to use Curtain Wall

1. Choose the plan, elevation and section templates.
2. Set the first mark and sheet number/name.
3. Select the title block and linked-model options if needed.
4. Run the command and review the generated views and sheet.

EXPECTED RESULT

Curtain-wall documentation views are generated and arranged on a new sheet.

Before you finish

QUICK CHECKLIST

- ◯ Correct model and active view
- ◯ Required types/templates are loaded
- ◯ Review settings before running
- ◯ Inspect the output in Revit
- ◯ Save a backup before bulk changes

COMMAND FLOW

01 SELECT

02 CONFIGURE

03 RUN

04 VERIFY

NOTES & LIMITATIONS

The output depends on valid curtain walls, view templates and a usable title block.
