

A-M-T 1.8.8

PRINT

COMMAND GUIDE

Exports selected Revit sheets or views to PDF and/or DWG using a guided three-step workflow.

A-M-T TOOL SERIES

Configure.
Run.
Review.

01 Understand the options

02 Follow the workflow

03 Check the result

Understand the settings

Step 1 — Select

Choose Sheets or Views, search the list and select the items to export.

Destination

Choose the output folder.

Filename

Choose filename parameters and their order, or enter a custom filename.

Existing files

If an output filename already exists, confirm whether it should be replaced.

Formats

Choose PDF, DWG or both.

Completion

Review successful and failed export counts; use Open folder to inspect output.

How to use PRINT

1. Choose Sheets or Views and select the required items.
2. Set filename parameters/order or a custom name.
3. Choose PDF/DWG formats and the destination folder.
4. Start the export and review the completion report.

EXPECTED RESULT

A-M-T exports the selected items and reports completed and failed exports. The output folder can be opened from the completion screen.

Before you finish

QUICK CHECKLIST

- ◯ Correct model and active view
- ◯ Required types/templates are loaded
- ◯ Review settings before running
- ◯ Inspect the output in Revit
- ◯ Save a backup before bulk changes

COMMAND FLOW

01 SELECT

02 CONFIGURE

03 RUN

04 VERIFY

NOTES & LIMITATIONS

Close exported DWG files in AutoCAD before exporting to the same filenames again.
