

A-M-T 1.8.8

TAP COLORING

COMMAND GUIDE

Uses the TAP Coloring command to visually group or color document tabs through pyRevit.

A-M-T TOOL SERIES

Configure.
Run.
Review.

01 Understand the options

02 Follow the workflow

03 Check the result

Understand the settings

Dependency

Requires pyRevit and its document-tab event utilities.

Compatibility

If the required pyRevit API is unavailable, the command reports that the feature is unsupported.

Enable / disable

The command starts or stops the tab-grouping behavior.

How to use TAP Coloring

1. Confirm pyRevit is installed and loaded in Revit.
2. Run TAP Coloring from the A-M-T ribbon.
3. Enable or disable the tab-coloring/grouping behavior as needed.
4. If unsupported, verify the pyRevit installation and version.

EXPECTED RESULT

Supported Revit document tabs are grouped/colored through the pyRevit integration.

Before you finish

QUICK CHECKLIST

- ◯ Correct model and active view
- ◯ Required types/templates are loaded
- ◯ Review settings before running
- ◯ Inspect the output in Revit
- ◯ Save a backup before bulk changes

COMMAND FLOW

01 SELECT

02 CONFIGURE

03 RUN

04 VERIFY

NOTES & LIMITATIONS

This command depends on pyRevit; it is not a standalone Revit API feature.
