

A-M-T 1.8.8

WET AREA VIEWS

COMMAND GUIDE

Creates a coordinated set of wet-area documentation views and can place them on a dedicated sheet.

A-M-T TOOL SERIES

Configure.
Run.
Review.

01 Understand the options

02 Follow the workflow

03 Check the result

Understand the settings

Level

Choose the building level to process.

Scale

Set the view scale used for the generated views.

Room selection

The command identifies rooms on the selected level and prepares the wet-area view set.

Title block

Choose the title block for the output sheet.

View templates

Assign templates for the main plan, flooring, ceiling, furniture and elevation views.

Sheet details

Enter the sheet number and sheet name.

How to use Wet Area Views

1. Choose the target level.
2. Assign the required view templates for each view type.
3. Set the scale and title block.
4. Enter the sheet number/name and create the views.

EXPECTED RESULT

The command generates the configured wet-area views and the corresponding sheet output.

Before you finish

QUICK CHECKLIST

- ◯ Correct model and active view
- ◯ Required types/templates are loaded
- ◯ Review settings before running
- ◯ Inspect the output in Revit
- ◯ Save a backup before bulk changes

COMMAND FLOW

01 SELECT

02 CONFIGURE

03 RUN

04 VERIFY

NOTES & LIMITATIONS

The available rooms and templates in the current project determine the resulting view set.
